

# GAS relieved

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acid. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips' Look for the name Phillips on the bottle. All druggists sell it - 50c.

(Made in Canada)

## The Canadian Constitution

Is the constitution of the Dominion of Canada, being the British North America Act, 1867, out of date?

Recent decisions by the higher Provincial courts of law, the Supreme Court of Canada, and the Privy Council all give point to the question.

In other words, is a hard and fast written constitution drafted in the eighteen-sixties of the nineteenth century, long before the days of the automobile, radio, airplanes, and modern big business suitable to our present twentieth century needs? Nay more, is the present distribution of powers and authority as between the Dominion Government on the one hand, and the various Provincial Legislatures on the other, the best arrangement under which to carry on our public business today, not to mention possibly even more complicated developments in the years to come?

Unlike Great Britain, which has no written constitution but is governed by a Parliament guided by precedent built upon precedent down through the ages, and which is, therefore, free to meet changing conditions as they change, Canada is bound by a formal document.

Furthermore, among all the self-governing Dominions of the Empire, Canada alone does not possess the power to amend its own constitution. That power rests solely with the Parliament of Great Britain.

The constitution of Canada was drafted just as the great American civil war was drawing to a close, and the Fathers of Confederation had ever in mind the conflict which arose in the republic to the south between the Federal authority and the advocates of State rights. The constitution of the United States is founded in the principle of State rights, and the Federal Government has authority in regard only to those matters specifically delegated to that Government. Where no specific delegation of authority as between the Federal and State authorities is made, then the authority automatically rests with the State. The Civil War resulted from the contention of the southern states that the Federal authority was interfering with and usurping certain of their State rights.

The Fathers of Confederation consequently drafted the B.N.A. Act on exactly the opposite principle. In Canada, the rights and powers of the Provinces are distinctly set forth and limited, and all matters not so specifically stated belong of right to the Dominion.

There are, however, certain subjects in regard to which authority is divided, as, for example, incorporation of companies. The Provinces possess the power to incorporate companies for purely Provincial purposes, while the Dominion can incorporate for Dominion purposes. Both are intensely jealous of their rights in this respect, and, as a result, there is continual dispute. For example, most Provinces are anxious to curb the stock-selling activities of corporations, and to bring them under strict government supervision and control. They have, therefore, enacted what are commonly termed "blue-sky" laws. But the Dominion has contended that such laws cannot apply to Dominion incorporated companies. The result is that any company desirous of evading such Provincial restrictions takes out a Dominion charter.

There has now arisen a dispute between the Dominion and the Provinces as to which authority can exercise control over radio broadcasting and reception. The Dominion has exercised that right to date, but it is now challenged by the Provinces. Suppose it should be established by a Privy Council decision that the Provinces are in the right and the Dominion wrong, under the old B.N.A. Act, would it be a good thing for Canada to have radio control cut up into nine pieces?

As a matter of fact, in a country of immense distances, divided by natural geographical barriers, is it not one of the handicaps of our national life that, in regard to many matters, lack of unity results because of Provincial jurisdiction in such matters which would be overcome through unified Dominion control?

On the other hand, there is the tendency on the part of Ottawa to take control over, or interfere with, subjects which are clearly matters for the Provinces. Constitutionally speaking, such a matter as Old Age Pensions belongs to the Provinces, but by enactment the Dominion Parliament decreed that it would contribute a certain proportion of such pensions if the Provinces adopted the plan. Some of the Provinces have done so, others have not. Such a pension system once established by a Province cannot easily be done away with, but there is nothing to prevent the Dominion Parliament from repealing its consent at any time, thus leaving the Province to face the whole of the financial burden. Similar action has been taken at times by the Dominion in such matters as highways construction, technical education, and grants for art and drama. Provinces have endeavored on these enterprises only to have Dominion assistance withdrawn later, to the financial embarrassment of the Provinces.

The question that naturally arises is: Has the time not arrived when the constitution of Canada should be overhauled and brought up-to-date? Should not representatives of the Dominion and of the nine Provinces meet in conference to consider the whole subject, with a view to clarifying the atmosphere and removing so many of the causes of present constitutional confusion before the courts? And is Canada not just as capable of amending its own constitution as is Austria, South Africa or the Irish Free State? Or must we remain in the eyes of the rest of the world as an inferior Dominion?

## Suffered From Heart Trouble Became Weak and Run Down

Mrs. W. W. Widdowson, Ont., writes: "For a long period I suffered from heart trouble and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The Milburn Co. Ltd., Toronto, Ont.

## Alberta Railways Act

Measure To Extend Time For Two Years For Completion Of Northern Road

Third reading was given in the House of Commons to a bill respecting the Northern Alberta Railways Act.

The object of the measure is to extend the time for two years for the commencement and completion of the main line of the Edmonton, Dunvegan and British Columbia railway from Spirit River, Alberta, "by the most feasible route and in a generally westerly direction to a distance of 102 miles, more or less, to a point in townships 78 or 79, range 18, west of the sixth meridian in British Columbia"; and for a branch line of the Central Canada Railway from near Grimshaw, Alberta, in a northerly direction to the northern boundary of Alberta.

## FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on the plan. I dropped the hem; and as the part that had been turned under was darker than the rest, I redyed the entire dress, after having bleached the goods, following directions in the Diamond Dyes package."

"I used Diamond Dyes for the redyeing, of course. I have dyed many things with these wonderful dyes. They are easy to use, cost very little, and have never failed to give perfect results—smooth, even colors—fast to wear and washing. Friends think my things are new when I redye or tint them with Diamond Dyes. They do give the most gorgeous colors."

Mrs. G. C. Levis, Quebec.

## The Cutworm Menace

Pale Western Cutworm Eggs Are Hatching In Infested Areas

A recent examination of fields in the area expected to be infested with pale western cutworm has shown that in some cases the eggs are beginning to hatch. This is especially true in the areas that have recently been visited with light rains or snow followed by warm weather.

The hatching of these eggs at this time will answer the question that has been in the minds of many farmers regarding the effect of the open winter on the pale western cutworm. There seems to have been a general impression among the people in the infested areas that the peculiar winter would effectively control the cutworm. This was to be accomplished either by the eggs being killed or the eggs hatching during the winter and the cutworms being killed. There is very little evidence from experimental work to show that either is possible.

The presence of pale western cutworm in the field can be easily determined in those fields which have some vegetation such as wild oats, volunteer grains, grasses or weeds present. The young cutworms feeding on this vegetation will eat holes in the leaves and some leaves may be cut off above the ground. The evidence of feeding is much easier to find than the cutworms themselves since they are at present very small and inconspicuous.

Fields which have such vegetation showing signs of cutworm feeding can not be seeded to crop with any hope of having it mature unless the season turns out to be exceptionally wet. Such fields might better be cultivated thoroughly and worked up as first class summer fallow for next season. Where this land cannot possibly be spared for summer fallow it should be cultivated thoroughly through the early spring and then left to late barley or oats after the middle of June. The date of this seeding will depend on whether or not cutworms are still active in numbers in the field.

Information regarding the pale western cutworm may be obtained by writing to the Dominion Entomological Laboratories at Lethbridge, Alberta; Saskatoon, or Indian Head, Saskatchewan; Treesbank, Manitoba; or to the University of Alberta at Edmonton; the University of Saskatchewan at Saskatoon; or the Provincial Departments of Agriculture at Regina or Edmonton.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and insinuate and restore healthfulness.

## Presented With Horses

Mounted Policemen At Empire Trade Fair At Buenos Aires Receive Gift

Four Royal Canadian Mounted policemen now on duty in the Canadian pavilion at the British Empire trade fair in Buenos Aires, have each been presented with two riding horses for their personal use. A cable to this effect, received at the Department of Trade and Commerce from Buenos Aires, does not make known the donor of this munificent gift but it is believed the eight horses were presented by the Argentine government.

The four members of the R.C.M.P. sent to the trade fair are: Sergt. J. R. Paton, M.C., of Victoria, B.C.; Constable Carstairs, of Medicine Hat, Alberta; Constable Carmichael, and Constable C. G. Fairman, both of Ottawa.

Previous reports from Buenos Aires said the four "Mounties" had captured the popular fancy in Argentina, a country noted for its horsemanship.

It is expected that about 20,000 new peach trees will be planted in the Oliver district of British Columbia this year.

## May Harness Natural Gas Going To Waste In Turner Valley To Generate Electric Power

Millions of feet of natural gas now going to waste every day in the Turner Valley, Alberta, may be harnessed to generate electric power for industrial and domestic purposes. A proposal to do this has been submitted to the Alberta Government by a British corporation, according to press reports. It is stated that the corporation offers to spend \$10,000,000 on the project at the outset and a total of \$100,000,000 within 15 years and to begin work on the construction of a plant within 60 days from the time the approval of the Alberta Government is given to the proposal. The plant will be capable of generating 70,000 horse power of electricity with a year.

The plan for this new project, as outlined, is to collect the waste gas in Turner Valley into one pipe line running to the power house where it would be used to turn specially-designed turbine wheels for the generation of electric power for which a market would be secured in industrialization of southern Alberta. The power house would be located at a point probably 30 miles east of Turner Valley and it would not depend alone on gas from Turner Valley but would utilize also gas from other fields. The corporation proposes, it is stated, to offer the electric power generated for sale in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, and also in the border states of the United States. The Government of Alberta is asked to pass legislation compelling all gas companies or individuals, whose gas is escaping and not being put to use, to supply the corporation with such gas at a price to be fixed through the Public Utilities Board. In consideration for the establishment of such a plant as proposed, an exclusive franchise for a period of 50 years to supply the corporation is requested. Provision would be made, if desired, for the Alberta Government to take over the plant on an equitable basis at some time in the future.

The scheme for utilization of the Turner Valley and other waste natural gas would produce electric power at a cost of about three-tenths of a cent per kilowatt-hour.

### Increase In Poultry

Value Of All Poultry In Canada Placed At Fifty-Four Million Dollars

Poultry keeping is on the increase in Canada. The total number of poultry on the farms in the Dominion at the end of last year was estimated at 60,755,000, of which 56,247,000 were hens and chickens; 2,386,000 turkeys; 1,160,000 geese and 989,000 ducks. The value of all these birds is placed at \$54,852,000. Two years ago the total number of poultry was 53,779,000. Poultry are successfully raised commercially in all of the provinces of Canada. The principal centre of the industry is the Province of Ontario.

### A Quick Thinker

Farm Labourer, to hiker's remark: "Faint, you see the notice saying pedestrians ain't allowed here?"

Hiker (with great presence of mind): "I'm not a pedestrian. I'm a congregationalist."

Labourer: "Oh, that's different. You can go on."

Manager: "I have just signed a contract for you to appear against Smith."

Champion: "I can't box him, we are enemies." Hagen Hammer, Montreal.

W. N. H. 1888

### Saskatchewan Coal Mining

New Regulations Governing Leases Are Made Public

Reduction in the maximum and increase in the minimum area allotted to any one lessee is provided for in the new coal mining regulations as published in the April 18 issue of the Saskatchewan Gazette.

Under the old Dominion government regulations the maximum area allowed was 2,560 acres, while the minimum was 20 acres. Only one location was allowed to any one person.

The new regulations provide for a maximum area of 640 acres in any one location, but provide for three locations to a person. Thus the total area provided for under the new scheme is 1,920 acres. The minimum size of a location is 40 acres.

There are little other changes in the regulations, except that under the present plans, any lessee must have a clear sheet with the department before he can obtain a new location or have an assignment registered.

### Did Not Choose To Speak

A young woman who wished to engage Calvin Coolidge in conversation, when he was president, told Mr. Coolidge that her father had had a war that she couldn't get him to answer three words. She expected that this would start him talking. But he said quietly: "Did wins?"

### FARM MANAGER

A. R. Judson, who is farm manager of the Dauphin zone for the Canada Farm Finance Corporation.

### Blind Will Benefit By New Invention

Instrument Produces Raised Letters From Ordinary Pages

Robert E. Naumburg, of Cambridge, Mass., has demonstrated for the first time a "printing visagraph," an instrument that produces magnified, raised letters from the pages of ordinary books.

The visagraph reproduces large, embossed letters on a wide roll of thin aluminum foil, with the result that the finished product corresponds in some respects to the Braille system. Naumburg estimates his machine will increase the reading range of the blind a thousand-fold.

## National Research Council Investigates Problem Of Effective Vaccine Against Tuberculosis

### Preparing Attractive Display

Quebec Is Taking Large Space At World Grain Show

His Excellency the Governor-General has consented to act as chief patron of the world grain exhibition and conference which will take place at Regina in the summer of 1932. One of the most attractive displays in the educational section of the exhibition will be that from the Province of Quebec. It has been decided to take a space of 200 feet frontage in the Exhibition building in order to give the thousands of visitors an idea of the agricultural activities of Quebec.

The centre feature of the exhibit will be a Quebec farm, complete with buildings, live stock, fields, sugar bushes, etc., flanked on either side with exhibits of natural resources of the province, including mineral, lumber, power development, handicraft and manufacturing products.

Argentina is the sixteenth country to officially accept the invitation of the Canadian Government to attend the Exhibition and Conference. The complete list of participants at present is as follows: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, The Netherlands, Belgium, Poland, Siam, India, Portugal, Switzerland, Estonia, The Philippine Islands and Argentina.

### No Hearsay Evidence

Court Case That Was Settled In Common Sense Way

It is well to see things done in a sensible way. To illustrate: In an Eastern city there was a queer case in court. One farmer claimed that a fire started in the bush by his neighbor, and spread to his property and had spoiled the land by burning off the top part of the soil.

Instead of arguing for days, officials, solicitors, and witnesses, took a trip out to the property in question, and along with them they had spades and shovels. They actually went to work and gouged holes in the ground to see if the damage was as serious as claimed, and to find out exactly what had taken place. Returning to court, the decision was made that the fire damage claim had not been sustained.

That was direct action and common sense.

### Not Looking For Miracles

Western Farmers Will Fight Way Back To Prosperity

"Twenty-five years from now we will be growing a good deal more wheat than today, and selling it in the world markets," said Hon. Duncan Marshall, one-time minister of agriculture in the Alberta Government, addressing the Eastern Canada Livestock Union at Toronto.

"Taken as a whole, I can say to you that the farmers in the Canadian West are not looking for any miracle to happen, or anybody to turn the country's economies upside down. They are going to win through to better days, as they have fought through earlier depressions," he declared. Mr. Marshall had just returned from a month's motor tour through the West.

### Measurements Accurate

Geodetic Survey Of Canada Made By Line And Triangles

Accurate measurements can be made across country by means of a measured line on the ground and a system of triangles. The triangulation of the Geodetic Survey of Canada, Department of the Interior, is conducted with the greatest degree of accuracy. Its usage involves the determination of the size and shape of the earth, the location of international and provincial boundaries, and numerous points of control for the general maps of the country. Adjusted geodetic points in great numbers are available to the public in every province of the Dominion.

The American golden plover, which breeds in Arctic America, migrates the entire length of North and South America, wintering in Patagonia.

"According to the committee of the National Research Council on tuberculosis research, much work remains to be done before the problem of an effective vaccine against tuberculosis is solved."

This statement was issued following an important conference on the subject in Ottawa, in which the leading doctors specializing in the study of tuberculosis took part.

The statement sets forth that the committee agrees "BCG" confers a degree of resistance to tuberculosis but the nature and extent has not been clearly demonstrated. Further studies are to be conducted to clear up these points definitely. About 1,000,000 infants have been vaccinated against tuberculosis. "BCG" is the vaccine of the Pasteur Institute of Paris.

The statement describes the work accomplished as follows: "BCG" (named after Prof. B. Calmette, the director of the Pasteur Institute and his colleague, Guérin) has to date been used in various countries to vaccinate a total of approximately 1,000,000 infants against tuberculosis. In the effort against bovine tuberculosis it has been put forward as a preventive measure that would eventually make unnecessary the expensive method now commonly employed of destroying animals reacting to this tuberculosis tests.

"Canadian researches on tuberculosis have been widely discussed in both Europe and America, particularly those of Dr. E. A. Watson, of the animal diseases research station, Dominion Department of Agriculture, at Hull, Que., who has recently been put forward by Calmette, Dr. A. C. Rankin, of the University of Alberta, and Dr. J. A. Baudouin, of the University of Montreal, whose work has tended to support Calmette's contention, and Dr. E. B. Reed, of Queen's University. Dr. Watson and Dr. Baudouin have carried on extensive experiments with cattle, and Dr. Baudouin has supervised the inoculation and study of 'O' infants in Montreal."

"Dr. Reed has recently made an important contribution to the knowledge on the subject and will publish his results shortly."

Dr. H. S. Ferguson, director of the Fort Qu'Appelle, Saskatchewan, Fort San, Sask., reported on the tuberculosis investigation that has been carried on under the auspices of the committee among the Indians of that district. He said that a family history of the Indians showed that within three generations there had been deaths from tuberculosis in nearly every family on the reserve. The worst tuberculosis epidemic was between the years 1880 and 1905. To decide the effectiveness of the work that was now being done, Dr. Ferguson reported that, while the incidence of tuberculosis among the Indians in 1928 was twenty times that of the surrounding white population, it was today only fifteen times, a reduction of one-third during that period.

Dr. H. M. Tory presided at the conference and 25 men and women engaged in the study of the disease took part.

### Grist Mill For Moose Jaw

Western Grist Mills Limited of Moose Jaw has started the erection of a 100-barrel mill and expects to have it completed in time to handle the 1931 crop.

"Do I know the business? Rather, I was very useful in the last place - I was I who used to call out to the others, 'Hush! Here comes the boss.'"

## MARKET VALUE OF BARLEY AND WHEAT WHEN FED TO STEERS

(Experimental Farms Note)

At the Experimental Station, Rosthern, Sask., during the winter of 1929-30, twenty head of yearling Shorthorn steers and heifers were divided into two equal lots of ten each, one lot being fed ground barley and cut oat sheaves and the other ground wheat and cut oat sheaves. The cattle were sheltered in barns protected from the winds by a solid board fence, the north end being covered over with poles on which there was a covering of straw. This shelter was well looked at all times and the cattle had access to water. The cattle fed ground wheat appeared to relish their feed better than those fed ground barley, but there was no waste of feed in either lot. The average daily consumption of feed amounted to 17 pounds of cut oat sheaves and 5 pounds of grain per day. The 17 pounds of cut oat sheaves contained approximately 5 pounds of threshed oats so that the grain ration really amounted to 10 pounds per day.

The 20 cent barley fed lot gained 2.19 pounds per day at a cost of 3.59 cents per pound gain, while the 50 cent wheat fed lot made a gain of 2.38 pounds per day at a cost of 4.15 cents per pound gain. It required 20 pounds more barley and 62 pounds more cut oat sheaves to produce 100 pounds gain when barley was fed than when wheat was fed. The returns per head were in favor of the barley group by a margin of 96 cents. The important feature of this experiment is the value found for these cheap, coarse grains when marketed through beef cattle. This is demonstrated in the following table:

Balance of barley and wheat per bushel when marketed through steers at various price levels, with cut oat sheaves at 95.66 per ton and salt at \$1.76 per cwt.

With steers at	Barley may be marketed at	Wheat may be marketed at
16c per lb.	\$1.59	\$2.22

## ALBERTA'S TRAVELLING HEALTH CLINIC

Alberta's travelling health clinic was operated last year at a total cost of \$13,125, according to information

## LOCAL & GENERAL

Note the change in prices for the fallides. Twenty-five Cents to Everybody.

Mr. Al. McInnis and family motored to High River for the week-end.

Mr. H. Morgan went to Calgary on Saturday to attend an executive meeting of the Postmasters' Assn.

Miss M. Henderson is spending a few weeks with her sister, Mrs. Roy Kendrick.

Mr. F. Phillips, of Youngstown, was visiting his daughter, Mrs. H. Goshing, this week.

Meedames Adsheld, Boorman, Edwards, Methow, Morgan, and C. J. Wrightson are attending the Grand Chapter of the Eastern Star in Calgary this week.

Mrs. C. Timmins, Mr. M. Timmins and Mr. L. Timmins, of Calgary and Mrs. Elkins, of Drumheller visited with Mr. and Mrs. Nyle Hunsperger on Sunday.

Mr. and Mrs. A. R. Kendrick and family and Mr. and Mrs. A. G. Stiller and family spent a few days at "Ingliside," Mr. Stiller's cottage at Sylvan Lake.

A meeting to arrange details for the Community Picnic which will be held at the fair grounds on July 1st will be held in C. E. Reiber's office next Thursday evening. All business-men and those interested are asked to attend.

At the opening tournament of the C.P. tennis club at Lethbridge on Saturday and Sunday, May 23rd and 25th, Mr. Cecil Stiller was the winner of the men's events on both days. Cecil is apparently keeping up his reputation as a tennis player.

Messrs. Bert Fisher and J. Topple left on Monday for a fishing trip to the headwaters of the Red Deer. They took the cars to the end of the road and packed into the forest reserve and national park from that point. Jack says: "Look out for a fish story next week."

The recital by Miss Kathleen Green, the girl abolitionist, given at Knox United Church on Friday evening under the auspices of the Junior C.G.I.T. was attended by a very appreciative audience. Her rendition of "Holloman" was very clever and much enjoyed. Piano solos by Betty Boorman, Bernice Methow and Lorna Clarke were rendered during the intermissions in the story.

The senior C.G.I.T. group were entertained at the home of Mrs. Hillyard for their closing meeting on May 27th. During the evening a beautiful "Recreation Service" was held, led by the leader, after which Miss Black presented the girls with their certificate. "In recognition of good work done during the year." Following a delightful lunch served by the hostess, a very happy evening was brought to a close when all joined in the "Friendship Circle" and Taps.

## DDD for acne and eczema

An active fluid that attacks disease germs in the skin. In harmony with the theory of the greatest living skin specialist, it has had many brilliant successes over skin disease.

H. W. Chambers

given by the Minister to questions in the House. This included the expense of school surveys made by public health nurses.

Work of the clinic was of a most widespread character, 27 points being visited from Fort Vermilion in the north to Wrentham and Barnwell in the south. 306 school districts were covered and 8,487 children inspected by public health nurses.

With a great find of sodium located in the Northwest Territories, Canada moves another step to the front among the mining countries of the world.—Petersburg Examiner.

Rev. J. J. Kuring, Pastor,

The "Go-Getters" enjoyed a very exciting ball game, married vs. single last Saturday evening at Chas. Young's. When it grew too dark to play ball, other games were played until everyone was ready for a lunch. It was decided they would all meet and play every Saturday evening at A. Krebs'. Everybody welcome.

Deceased was 67 years of age and was born in London, England. He had been in Canada two years. The funeral takes place today at the Waterloo cemetery.

comes from years of experience—most of our troubles are imagined ones. They have no existence without permission. They come as tolerated guests; then proceed to make themselves the masters in the home. They rob us of sleep, upset our diges-

tion, drive contentment out of us, plow untimely furrows in our faces, and plant unalleviated anguish in our hearts. They even shorten life itself. "Worry kills more people," said a wise doctor, "than all other diseases put together."—Exchange.
